Dear Postar

I received the news pamphlet last night from you I certainly was glad to get it to.

I might say that I am now some where in Belgium I also have seen lots of other countries, most of them are very pretty.

The Country of France has the Country of England about 2 to 1 in everything. They have pretty towns along with some nice highways. The fields are perfect for farming also. I like they raised tons & tons of sugar beets, along with grain.

I might add of all the Countries I've been in Belgium is the first one to remind me of the States here. The streets are like ours along with Trolleys to take you places in the towns. There are quite a few of large cities here also. In some places you wouldn't even realize that there had been a war in this Country at all.

I only wish that a lot of the people there could have seen some of the things we ~~see~~ see. I know a lot of them doesn't realize the pushing around they have had here. There are lots who think still like the Germans, regardless of what they did.

I hope to hear from you more often, for I like to read the news. I am glad that the Cross turned out so well. I am not certain whether you will enjoy reading this letter, for I am in the fur of mud. Yours truly
P. B. B.
